Fujithrough Elevator Group

VILLA ELEVATOR

Fujithrough Elevator Industry Co., Ltd. of Japan

Fujithrough (Guangdong) Elevator Group Co., Ltd.

Address: No. 1 Xinglong 3rd Street, Zhaoqing High Technology Development Zone, Guangdong Province

The book is a general publication of information field. We reserve our right to change the design and issue new statement at any time.
No word or sentence in this book, no matter its literal meaning or implication, assumes any responsibility for any product, its use and quality, or the expression and modification of any purchase and sale contract clauses.
Since the limitation of printing technique. The real color of the product is likely to be a bit different from the ones in this book, the last selection will depend on the actual material and color sample.

First version, 2023

Villa elevator

Villa Elevator

High quality home elevators in luxurious villas show villas' nobility from the inside out. They are more convenient for the elderly and the children. At the same time, villa elevators combine beauty, comfort, safety, energy saving along with low noise. They can also be designed or customized to match different styles and structures.

The good performance of Fujithrough Elevator Industry Co., Ltd. of Japan is the guarantee of timely after-sales service. As a professional elevator company, we believe that our advanced products and quality service can not only make customers' home elevators function better, but also make your house splendid and outstanding.

▶ Beauty

▶ Comfort

▶ High end

Integrated Solution with Internet of Things Service Platform

We adopt the technical system of "smart terminal + platform + big data + service" to provide an integrated solution for monitoring, early warning, rescuing, supervision, operation, maintenance and business linkage services.

• Smart terminal platform

About failure

- Real-time monitoring, remote repair.
- Notify the maintenance department and property management as soon as possible when the failure occurs.
- The car can be electrically connected to the outside world.

About maintenance

- Elevator usage records can be checked on a daily basis.
- Expired maintenance will be notified on time.
- Remind elevator annual review in advance and apply penalty when influencing elevator operation.

About failure rescue communication

- The car is equipped with one-button call function, when the elevator fails and the person can't contact with the outside due to no signal of the mobile phone, he can get contact with the outside directly through this button.

One-button call function

• Monitoring, early warning, rescuing, supervision, operation, maintenance

• Real-time monitoring, remote repair.

Standard outbound call:
circular outbound call:
COB19

Operation box

Standard COP: 10.1 inch
snap-on touchscreen
Model: SFTC-CCB-T10.1-BT

Non-standard COP: Plug-in
10.4-inch touchscreen
horizontal screen
Model: CCB-T10.4-BF

Elevator Parallel Track Bracket
(multi-color optional)

Landing door

Electric double door
(standard)

Electric single door
(optional)

Pulling door
(optional)

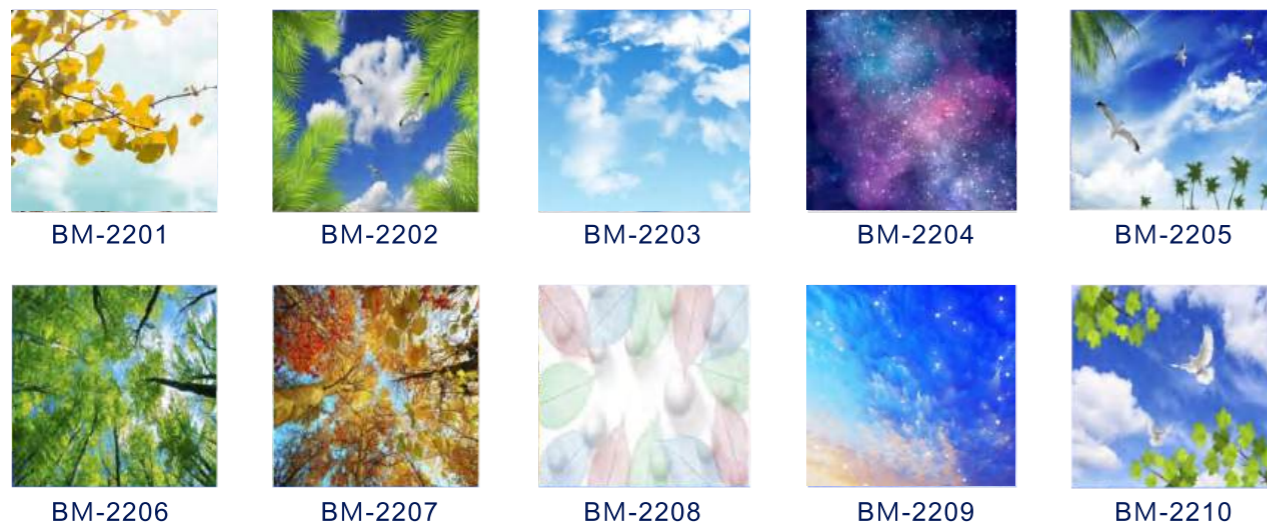

Electric folding door
Color: silver white
(optional)

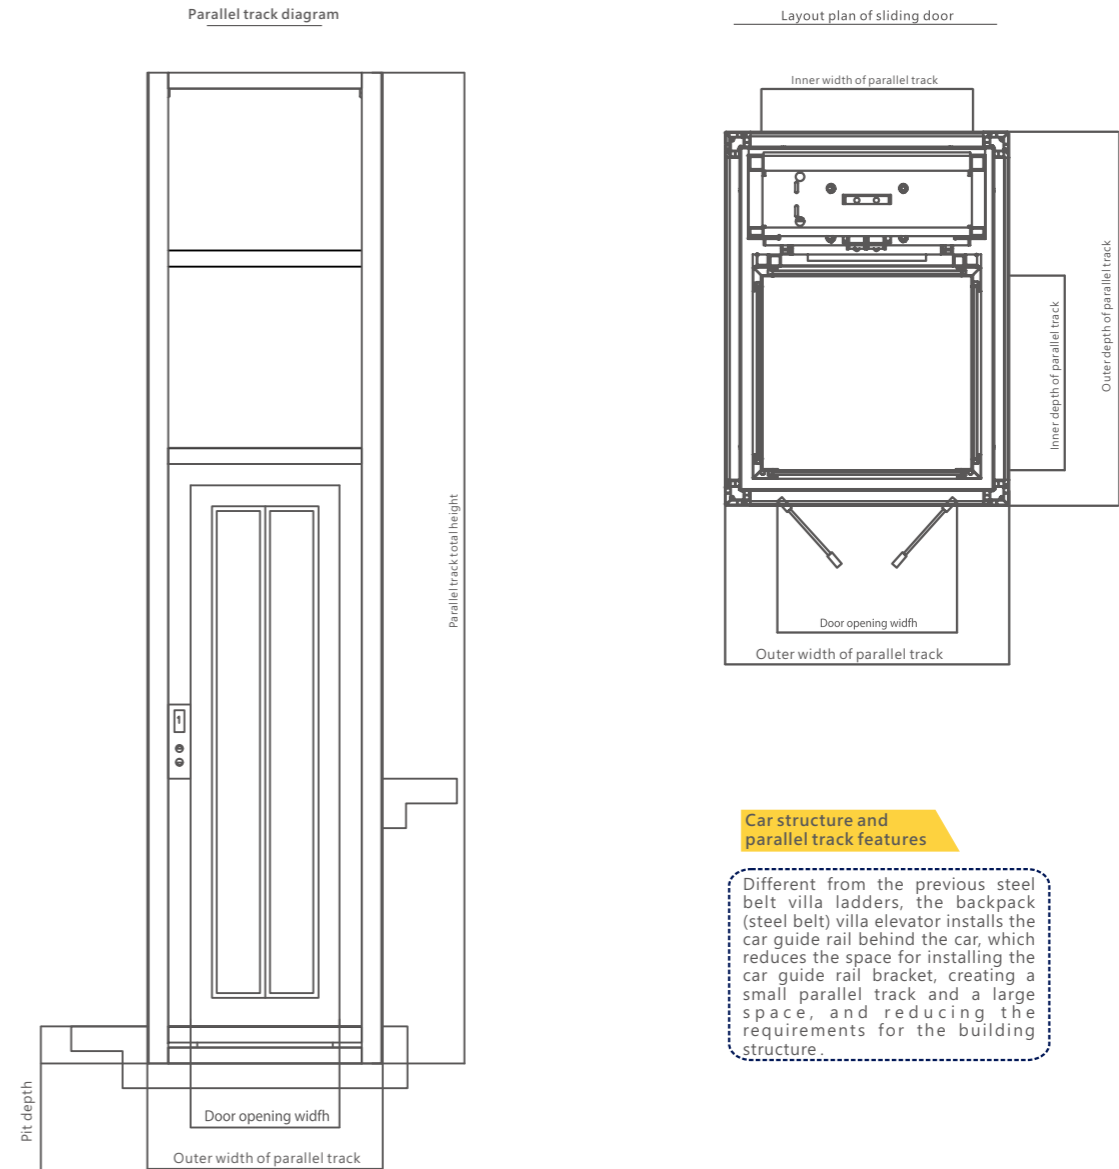

Toughened glass interior panel (Suitable for backpack type villa ladder only)

3D Curtain ceiling

Villa elevator Layout

Car structure and parallel track features

Different from the previous steel belt villa ladders, the backpack (steel belt) villa elevator installs the car guide rail behind the car, which reduces the space for installing the car guide rail bracket, creating a small parallel track and a large space, and reducing the requirements for the building structure.

Villa elevator technical parameters

Model	Rated Load	Capacity	Speed	Parallel track Size	Car Size	Door Opening Size	Roof height	Pit Depth	Way of opening the door
ELEGANT	250	2	0.4	1050x1450	800 × 900 × 2200	600 × 2100	3000	150	Electric double door
ELEGANT	320	3	0.4	1150x1550	900 × 1000 × 2200	700 × 2100	3000	150	Electric double door
ELEGANT	400	4	0.4	1250x1650	1000 × 1000 × 2200	800 × 2100	3000	150	Electric double door
